### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sheridan Neimark on 2-13-04. The application has been amended as follows:

In page 17, line 2 please amend to recite, "electrically connected to the cathode-reflectors or cathodes 14 and 16. The discharge cell 10 is."

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Please insert a "Prior Art" label in figures 1-3. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or obviously suggest the claimed invention.

4. Specifically, no teaching or obvious suggestion was found of the limitation "the first auxiliary discharge is a magnetron discharge with heated cathode, and the second auxiliary discharge is one of the following: a Penning discharge, and a Penning discharge with hollow cathode" as in claim 1.

5. In addition, no teaching or obvious suggestion was found of the limitation " the multiple-electrode cathode comprises a first elongated self-heating electrode, a second flat reflective electrode in which at least one opening forming at least one emitting aperture is made, and a third reflective electrode the first electrode being electrically connected to the third electrode, when the device is put in operation" as in claims 13 and 40-43.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat No 5,336,533 issued to

Balmashnov et al; US Pat No 4,282,083 issued to Kertesz et al; US Pat No 4,030,996 issued to Penfold et al; US Pat No 4,423,355 issued to Kageyama; US Pat No 5,702,573 issued to Biberger et al; US Pat No 5,597,459 issued to Altshuler; US Pat No 5,482,611 issued to Helmer et al; US Pat No 4,842,703 issued to Class et al; US Pat No 4,728,862 issued to Kovarik et al; US Pat No 4,344,019 issued to Gavin et al; US Pat No 6,124,675 issued to Bertrand et al; and US Pat No 6,661,178 issued to Bertrand et al are considered relevant to the claimed invention. In addition, "Current-Voltage Characteristics of a Reflex Discharge with a Hollow Cathode and Self-Heating Electrode" authored by Kagadei et al is considered wholly pertinent to the claimed invention, but fails to bar the instant application since it was available to the public least than a year (~ Mar. 16, 2001) from the filing of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kalimah Fernandez whose telephone number is 571-272-2420. The examiner can normally be reached on Mon-Tues 6:30-3:30; Wed-Thurs 8-5 and Fri.9am-6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R Lee can be reached on 571-272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
